

Dear professor Vicente Julián Inglada,

I write on behalf of the Instituto de Biomecánica de Valencia (IBV) in support of the proposal for the Chist-Era 20 Call Advanced Brain-Computer Interfaces for Novel Interactions to fund the *Architecture for Personalized Multimodal Body Computer Interfaces (ArPeMBoCI)* project, aiming at taking Brain-Computer communication to a new state of development.

We strongly support this grant application and the focus on the development of a multimodal body-computer interface ecosystem that makes use of Edge AI technology and integrates multiple intelligent sensor devices, conforming a new communication tool for people with diverse skills and needs.

We are committed to assist the ArPeMBoCI consortium in their collaborations and networking efforts to technologically take the Body-Computer Interfaces and the processing needed to the closest point of interaction with the user, whether it is an IoT device or an Edge server.

Through this letter, we express our full and unconditioned support for the ArPeMBoCI project. We look forward to working with you and the other partners in ArPeMBoCI, and to contributing to the development of this new Body-Computer Interfaces.

Yours sincerely,

Mr. José Javier Sánchez Lacuesta  
Managing Director  
Instituto de Biomecánica de Valencia (IBV)
